

**WORKBOOTH**

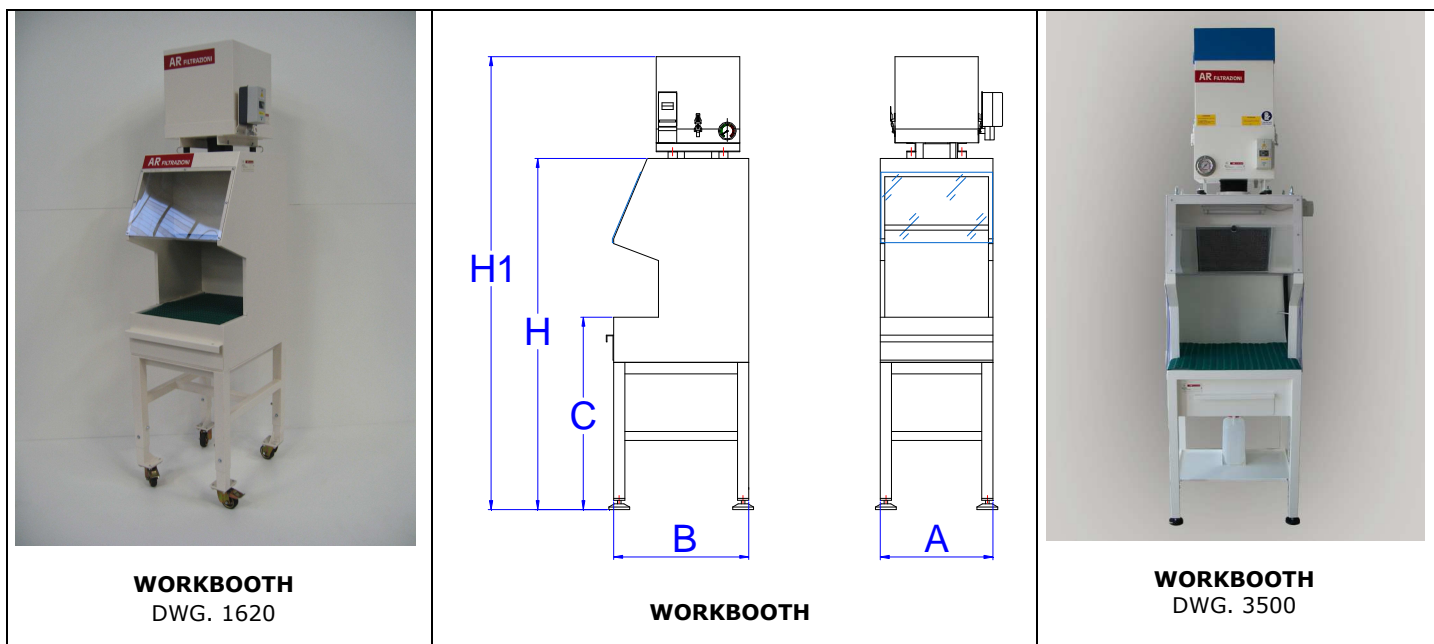

The trailer-mounted ecological work-booths, with ergonomic design, allow the highest degree of cleanliness of the working environment.

It is equipped with the protective screen made of transparent Lexan to safeguard the machine operator, a lamp illuminates the workplace and an easily removable chips collector prevents their diffusion in the working environment and on the clean worked pieces.

The work-booth is completely soundproof to reduce noise pollution.

The booth is equipped with a stage for the pre-filtration of chips and is prearranged to be equipped with an air cleaner of the ECO and ECO TWO series for the captation and purification of oil mist produced during the processes of blowing and snagging of the worked pieces. As an alternative, oil mist could be removed through a direct connection to the air cleaner installed on the machine tool.

Equipped with leveling feet.

**TECHNICAL DATA**

Drawing	Suction inlet Ø (mm)	Overall dimensions (mm) Excluding height of leveling feet (50mm)				H1
		A	B	C	H	
<b>1620</b>	100/120	500	600	850	1550	H1= H + HEIGHT OF AIR CLEANER (SEE TECHNICAL DATA ATT.)
<b>3500</b>	100/120	700	600	850	1750
